

Quattrocycle

The family bike with suspension and shifted gears

The Quattrocycle is the ideal product for:

- Rental by the hour at camp grounds, resorts etc.
- Guided tours
- Outdoor activities for companies
- Tours through nature on sand trails
- Activities for elderly or disabled people

Innovation in recreation

Riding the Quattrocycle is:

- **Sporty:** Everyone pedals in its own pace by individual shifted gears per seat.
- **Comfortable:** The Quattrocycle has full suspension and comfortable adjustable seats. This even makes riding on unpaved road a pleasure.
- **Sociable:** Four persons together on the Quattrocycle and children can sit on the back.
- **Interesting:** The fat tires and the suspension enable riding on unpaved roads, where normal street bikes cannot ride. Ideal for GPS-tours.
- **For everybody:** From 8 to 80 years as the seats can be adjusted over a long distance. Small children can sit at the back.
- **Practical:** Everything and everybody fits on the Quattrocycle. Luggage can be put on the luggage rack.
- **Safe:** Riding the Quattrocycle is even safer than riding a bike. The child seats at the back have seat belts.

The standard color of the Quattrocycle is silver-grey. Other colors available upon request

By using the shifted gears, The Quattrocycle can also be used on unpaved roads. The Quattrocycle is available with 3 gears for each seat.

Luggage can be put at the back. Also child seats can be put on the luggage rack.
